

SHUBHAM DHAUNDIYAL

Software Engineer | MERN Fullstack Developer

9837601562 | shubhamdhaundiya1789@gmail.com | [Linkedin](#) | [GitHub](#) | Noida

PROFESSIONAL SUMMARY

MERN Full Stack Developer with 2.3+ years of experience building scalable web applications using **JavaScript, TypeScript, React.js, Redux, Next.js, Node.js, Express.js, and MongoDB**. Skilled in developing responsive user interfaces, RESTful APIs, authentication systems, and integrating frontend and backend services. Experienced in micro-frontend architecture, performance optimization, state management, and caching strategies. Strong frontend expertise with solid backend development experience, enabling the delivery of high-performance and maintainable applications. Proven ability to collaborate in Agile teams and contribute across the software development lifecycle.

Seeking a **MERN Full Stack Developer** opportunity to leverage my expertise in building scalable web applications, contribute to innovative projects, and continuously grow my technical skills.

PROFESSIONAL EXPERIENCE

MERN FullStack Developer

May/2024 - Present

Panorama Software Solutions Pvt. Ltd, Noida

Projects and Domains

BotX (*Conversational AI / Generative AI*), Hawkeye (Admin Portal), HealthConnect (Healthcare Domain)

SKILLS

- **Programming Languages:** JavaScript, TypeScript
- **Frameworks & Libraries :** React.js, Next.js, Redux, Node.js, Nest.js
- **Frontend Technologies:** React.js, Vue.js, Next.js, Redux, HTML5, CSS3, Styled Components, Micro-Frontend Architecture
- **Backend Technologies:** Node.js, Express.js, Nest.js, REST APIs, Authentication & Authorization
- **Databases:** MySQL, MongoDB
- **Cloud & DevOps Tools:** Docker, Amazon Web Services CloudWatch, Amazon S3, Jenkins
- **Testing Tools:** Jest, Postman
- **Monitoring & Logging Tools:** Datadog
- **AI Tools & Technologies:** Claude, Cursor AI, Cline ChatGPT, GitHub Copilot etc,
- **Version Control & Documentation:** Git, GitHub, Swagger
- **Messaging & Event Streaming:** Apache Kafka
- **Development Approaches:** Agile/Scrum, Performance Optimization, API Integration, Security Testing, Caching, Scheduler Implementation

PROJECTS

1. BotX (Conversational AI SaaS Platform)

Tech Stack: React.js, TypeScript, Nest.js, Redux, Node.js, Nest.js, TypeORM

- Designed and implemented the **micro front-end** using **React.js**, with a focus on responsive UI using Material UI.
- Implemented **Redux** for state management to manage and centralize the data.
- Worked on **enhancing the security of the application** by identifying and addressing various vulnerabilities, including HTML- based attacks, broken access control, and response manipulation. Utilized Burp Suite for thorough security testing and mitigation to safeguard the application from potential threats.
- Developed a configuration-driven micro-frontend integration mechanism using iFrames to seamlessly onboard externally hosted applications, reducing dependency on hardcoded implementations and improving platform scalability.

- Developed middleware in **Node.js** to intercept, validate, and transform API requests and responses, improving backend data flow control and security.
- Implemented a scheduler within the SDK to automate recurring tasks and integrated caching mechanisms to improve performance and reduce API calls.
- Contributed to backend development using **Node.js and Nest.js**, implementing RESTful APIs, handling authentication, and integrating with databases to support dynamic features and business logic.
- Worked on AWS services for monitoring and observability, including tracking application traffic and monitoring EC2 instances and ECS services using AWS CloudWatch, while utilizing Amazon S3 for log storage and data management.
- Addressed and resolved UI issues through systematic debugging, enhancing visual design and usability, which contributed to improved user satisfaction and engagement.
- Wrote unit and integration test cases using Jest to ensure code reliability and catch regressions early in the development process.

2. Hawkeye (Enterprise Admin Portal)

Tech Stack: React.js, TypeScript, JavaScript, Next.js, Redux, Node.js

- Designed and implemented responsive, user-friendly UI components using **Next.js** to enhance user experience and improve platform usability.
- Successfully transitioned a **React** application to **Next.js**, optimizing performance and improving SEO.
- Refactored existing codebase to leverage Next.js's server-side rendering and static site generation capabilities.
- Implemented **Next.js** routing system, replacing react-router-dom with page-based routing.
- Ensured seamless integration with existing **Redux** and styled-components setups.
- Conducted thorough testing to validate functionality and maintain application stability post-migration.
- Designed and implemented a scheduler that automatically generates weekly Slack reports for GA feature flags, supporting multiple reporting intervals to improve release visibility and monitoring.

3. HealthConnect (Healthcare Management Platform)

Tech Stack: React.js, TypeScript, JavaScript, Next.js, Redux, Node.js, MongoDB

- Designed and developed responsive patient and doctor dashboards using **React.js and Next.js**, enabling efficient management of appointments, prescriptions, and medical records.
- Developed RESTful APIs using **Node.js and Nest.js** for appointment scheduling, patient registration, medical history management, and prescription tracking.
- Implemented JWT-based authentication and **role-based access control (RBAC)** for Patients, Doctors, and Administrators to ensure secure access to sensitive healthcare data.
- Integrated **Redux** for centralized state management and optimized API interactions to improve application performance.
- Built appointment booking and scheduling modules with automated reminders and status tracking.
- Developed secure document upload functionality for medical reports and prescriptions using AWS S3 storage.

EDUCATION

Himalayan School Of Science & Technology, Dehradun (Uttarakhand)

Bachelor of Technology (CSE) with Specialization in Cloud Computing (IBM) (8.8 CGPA)

2019 - 2023

Army Public School, Rishikesh (Uttarakhand)

Intermediate (72.2%)

2017 - 2019

SDM Public High School, Rishikesh (Uttarakhand)

High School (8.8 CGPA)

2016 - 2017

Training/Certificate

6 Months Industrial Training in **MERN** from **DUCAT NOIDA**

1/10/2023 - 01/04/2024

Cloud Computing Diploma — **International Business Machines (IBM)**

14/08/2019 - 10/07/2023
